

Sign in with your Google account and you'll see any trips you've been invited to. The app works in any browser — no install needed, though you can add it to your home screen for a native feel. Below is a tab-by-tab guide to everything available to you.

## Itinerary

- **Full day-by-day schedule** — flights, activities, driving segments, and hotel stays organized by region and date.
- **Add & edit activities** — tap the edit icon on any day to open the activity editor and add your own entries or tweak existing ones.
- **Notes & photos on activities** — tap any activity to attach memories, photos, or videos that the whole group can see.
- **Recommendations** — star an activity to flag it as a must-do for everyone.
- **Visual cues** — Michelin restaurant badges, hotel stay markers, and driving segment indicators at a glance.

## Overview

- **Interactive route map** — all waypoints, cities, and stops plotted on a map so you can see the whole journey at once.
- **All flights in one place** — outbound, in-trip, and return flights with times and airports.
- **Hotels list** — every accommodation with dates and locations for the whole trip.
- **Trip stats** — total nights, year, and key figures summarized cleanly.
- **Memory highlights** — curated photos and moments from the trip shown as a visual reel.

## Wishlist

- **Browse shared ideas** — see every place, restaurant, or experience the group has flagged for the trip.
- **Add your own ideas** — submit a new entry with an emoji, description, and an optional link or note.
- **Edit or remove your entries** — update or delete anything you've added at any time.

## Changes

- **Live change log** — a running list of every update made to the trip, newest first.
- **Who changed what** — each entry shows the action, who made it, and when.
- **Stay in the loop** — useful for catching up after the admin updates flights, hotels, or the schedule.

### Signing in

Use your Google account — you'll automatically see any trips you've been invited to.

### Install on your phone

Tap "Add to Home Screen" in your browser for offline access and a native app experience.

### Real-time sync

Changes from anyone on the trip appear live — no refresh needed.
