

Hardin Trips

EVERY JOURNEY, REMEMBERED

Guest Guide

A walkthrough of the Trips app for the whole family: how to sign in, find your way around a trip, and add memories.

This is the **guest** edition, for family members Erik has shared trips with. The screenshots use made-up sample trips, so your own trips and names will be different.

Contents

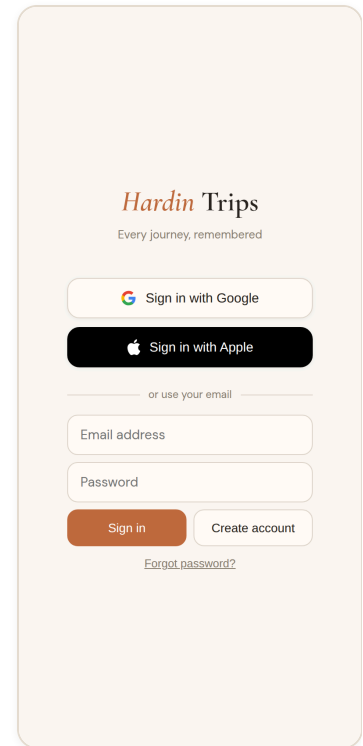

1. Signing in
2. Who can do what
3. The home screen
4. A trip's itinerary
5. Memories: notes and photos
6. Quick-editing a day's activities
7. The Overview tab
8. The Changes tab
9. The Wishlist tab
10. Sharing a trip
11. The iPhone app
12. Tips and FAQ

I. Signing in

Open the app and choose how to sign in. There are three ways, and each one works with the email address Erik gave access to:

- **Sign in with Google:** tap it and pick your Google account.
- **Sign in with Apple:** tap it and use your Apple ID. If Apple asks, choosing **Share My Email** is simplest. If you choose **Hide My Email**, Apple makes up a private address, and Erik has to add that address instead (the app shows it to you).
- **Email and password**, for any other email (Yahoo, Outlook, iCloud, work). Use the boxes under *or use your email*. The first time, you create an account (below). After that, type your email and password and tap **Sign in**.

If you forget your password, type your email and tap **Forgot password?**. The app emails you a link to choose a new one.

The image shows a mobile app login screen for 'Hardin Trips'. At the top, the logo 'Hardin Trips' is displayed in a serif font, with the tagline 'Every journey, remembered' underneath. Below the logo, there are two large buttons: 'Sign in with Google' (with the Google logo) and 'Sign in with Apple' (with the Apple logo). A horizontal line separates these from the text 'or use your email'. Below this line are two input fields: 'Email address' and 'Password'. At the bottom of the form are two buttons: 'Sign in' (in orange) and 'Create account' (in white with an orange border). A link for 'Forgot password?' is located at the very bottom of the screen.

Creating an email and password account

1. Fill in the form	2. Verify your email	3. Wait for Erik
Hardin Trips Every journey, remembered  Sign in with Google  Sign in with Apple or use your email Your name grandma@example.com Password Confirm password Sign in Create account Forgot password? Add your name and confirm your password, then tap Create account again.	Hardin Trips Every journey, remembered We sent a verification link to grandma@example.com. Open it, then come back and tap "I've verified". I've verified Resend email Sign in with a different account	Hardin Trips Every journey, remembered Thanks! Your request to join was sent to Erik (grandma@example.com). This page opens by itself once you're added. Sign in with a different account

1. Type your email and a password, then tap **Create account**. Two more boxes appear: **Your name** and **Confirm password**. Fill them in (the password needs at least 8 characters) and tap **Create account** again.
2. The app sends you a verification email. Open it, tap its link, then come back to the app and tap **I've verified**. Didn't get it? Tap **Resend email**.
3. If Erik already added your email, the app opens. If not, the app sends him a request for you and shows "Thanks! Your request to join was sent...". Leave the page open, or come back later: it opens by itself once you're approved.

The request step works the same way with Google and Apple. To try another account, tap **Sign in with a different account**.

Installing, signing out and deleting your account

- **Install it like an app:** in Safari, tap **Share** → **Add to Home Screen**. The app then opens full-screen with its own icon. You can also use the real iPhone app ([section 11](#)).
- **To sign out**, tap the  lock in the top-right corner of the home screen, then **Sign out**.

- **To delete your account**, tap the  lock, then **Delete account**. You confirm with your sign-in one more time. This removes your sign-in and your access. Trips you created stay in the app for everyone else.

2. Who can do what

Every account has one of three roles. Erik sets each person's role.

	Guest	User	Admin
See trips	Only trips they've been given	Their own trips, plus any shared with them	All trips
Add memories, wishlist ideas, quick activity edits	✓ on their trips	✓	✓
Share a trip link	✓	✓	✓
Create new trips	—	✓ (their own)	✓
Edit trip details, Logistics tab	—	✓ on their own trips and trips shared with them	✓
World map	—	—	✓
Booking inbox and AI assistant	—	✓ (their own bookings, on trips they can edit)	✓
Admin tools (users, packing template, PDFs, CSV import...)	—	—	✓

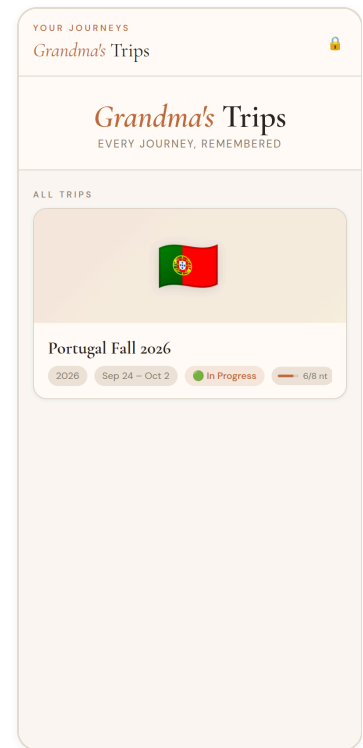

3. The home screen

The home screen lists your trips as cards:

- **In progress** trips come first. They show a ● badge and a bar counting nights completed (for example, *6/8 nt*).
- **Upcoming** trips come next, soonest first, with a countdown (*180 days away*).
- **Past trips** are grouped in a collapsed section at the bottom. Tap it to expand.

Tap a card to open the trip. **When a trip is in progress, the app opens straight to it.** Tap ◀ to get back to the list.

The header shows your own name ("*Grandma's Trips*"). Tap 🔒 to sign out or delete your account.

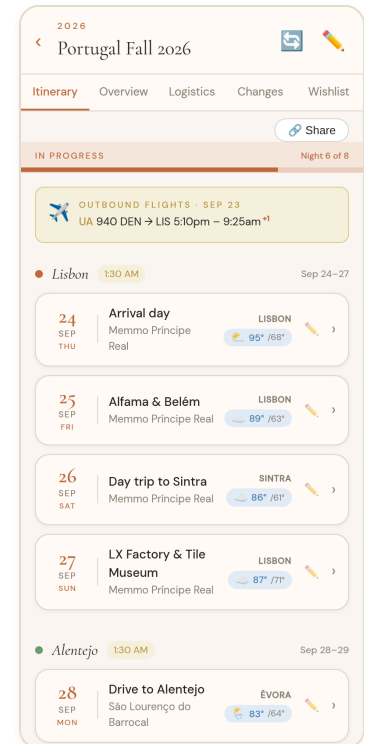

4. A trip's itinerary

Opening a trip shows the **Itinerary** tab. Along the top are the other tabs: **Overview**, **Changes** and **Wishlist**.

From top to bottom:

-  **Share** creates a link anyone can open without signing in ([section 10](#)).
- **In Progress** bar: shows how far into the trip you are (*Night 6 of 8*).
- **Flight banners** for outbound and return flights. A red **+1** means the flight lands the next day.
- **Region headers** (*Lisbon, Alentejo...*) group days by area, with the region's dates and a **pill showing the current local time there**.
- **Day cards**: date, what the day is about, the hotel, the city, and a **weather pill** (forecast high/low for upcoming days, actual weather for past days). A  chip appears on days in a foreign-language country; tap it for useful local phrases.

In the header,  refreshes the current tab.

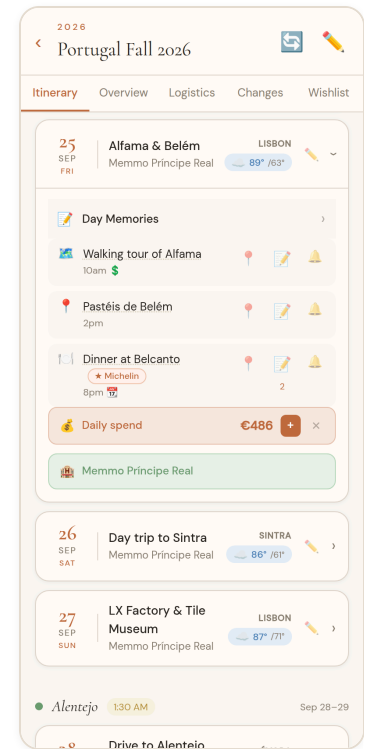

Inside a day

Tap a day card to expand it. **Today's** card is outlined and marked *TODAY*, and the app scrolls to it automatically.

-  **Day Memories** holds notes and photos about the day as a whole.
- Each **activity** shows its time and booking status:

Icon	Meaning
	Booked
	Paid
	Not booked yet
	No reservations taken
	Walking in
★ Michelin	Michelin-starred restaurant
 driving	You'll drive to this one

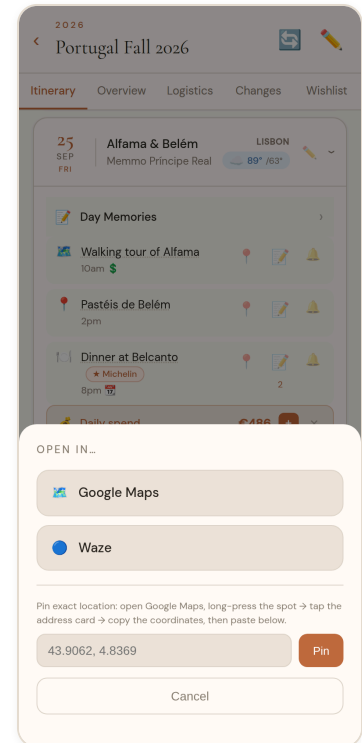

- Tap an **activity's name** to search for it on Google.
-  opens the place in Google Maps or Waze (see below).
-  opens that activity's memories. The small number underneath counts how many there are.
-  (in-progress trips, activities with a time): sets a phone reminder telling you when to leave. It uses the drive time when one is known, otherwise 30 minutes early. Reminders can only be set up to 3 days ahead.
- The green bar at the bottom shows that night's **hotel**.
-  on the day card opens the quick activity editor ([section 6](#)).

Opening a place in Maps

Tapping 📍 asks whether to open **Google Maps** or **Waze**.

If the app pins the wrong spot, you can fix it: in Google Maps, long-press the correct location, copy the coordinates from the address card, paste them into the box here, and tap **Pin**. The app remembers the corrected location for maps and drive times.

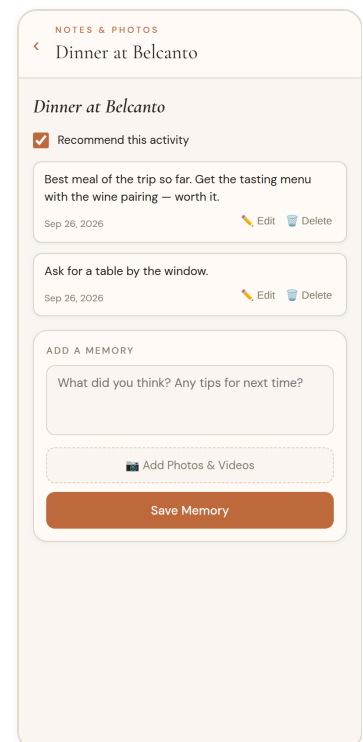

5. Memories: notes and photos

Tap 📝 next to an activity, or **Day Memories** on a day card, to open its memories.

- Type in **Add a Memory**: what you thought, tips for next time, what to order.
- Tap 📷 **Add Photos & Videos** to attach pictures or clips from your phone.
- Tap **Save Memory**. Everyone with access to the trip will see it.
- Use ✏️ **Edit** or 🗑️ **Delete** on your saved memories.
- Tap any photo to view it full-screen. Swipe or use the arrows to move between photos.
- **Zoom in on a photo** by pinching with two fingers or double-tapping the spot you want to see. Drag with one finger to look around while zoomed, and double-tap again (or pinch back out) to return. On a computer, use the scroll wheel or double-click, and drag to pan. Photos are saved at high resolution, so they stay sharp when zoomed.

Adding photos needs an internet connection. See [Tips and FAQ](#) for offline use.

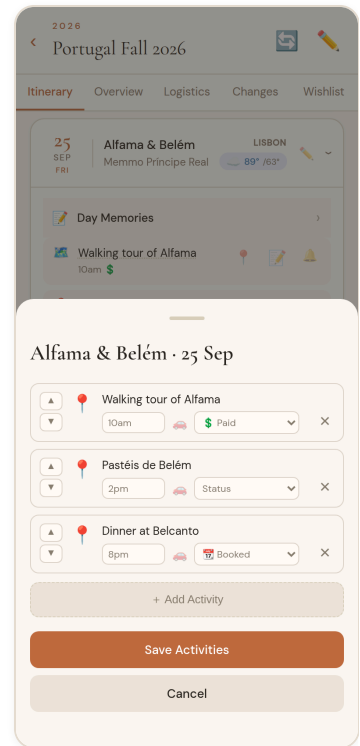

6. Quick-editing a day's activities

The  on a day card opens a quick editor for that day's activities:

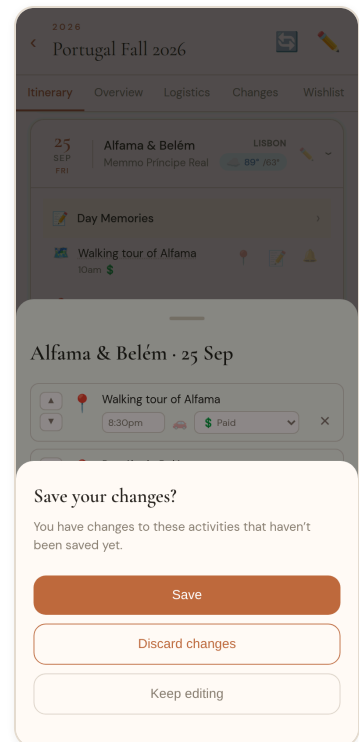

- ▲ / ▼ reorder activities.
- Change the **time** (use am/pm, like 7:30pm or 10am–2pm).
-  toggles whether you're driving there. That controls the drive-time estimate.
- The **status** menu sets the booking status (Booked, Paid, Not booked...).
- ✕ removes an activity. The app asks first, and offers **Move to Wishlist** if you'd rather keep the idea for later. + **Add Activity** adds one.
- Tap **Save Activities** when done.

Every change is recorded in the **Changes** tab.

Unsaved changes are never lost by accident. If you close the editor (or tap outside it) with changes you haven't saved, the app asks:

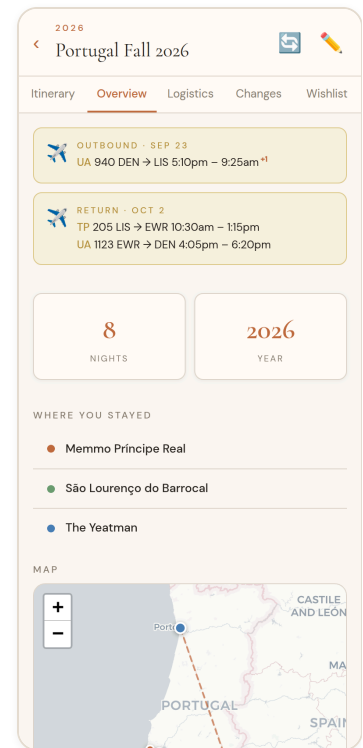

- **Save:** keeps your changes.
- **Discard changes:** throws them away.
- **Keep editing:** goes back to the editor.

7. The Overview tab

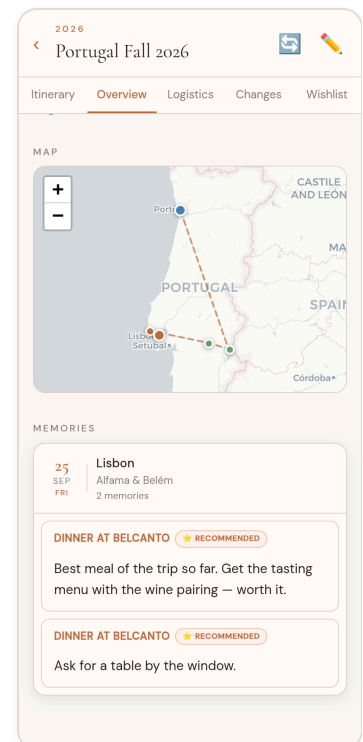

Overview is the trip at a glance:

- All **flights**: outbound, any flights during the trip, and return.
- **Stats**: number of nights and the year.
- **Where you stayed**: each hotel, color-coded by region.

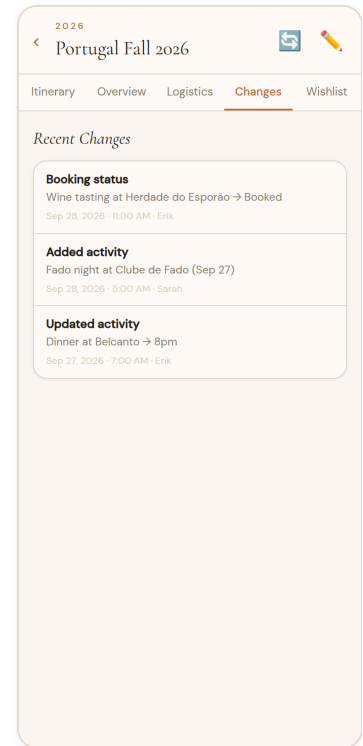

Further down:

- **Map** of the route, with a colored dot for each stop. Pinch or use **+/-** to zoom, and tap a dot to see the city's name.
- **Memories**: every note saved on the trip, grouped by day, with recommended activities highlighted.

8. The Changes tab

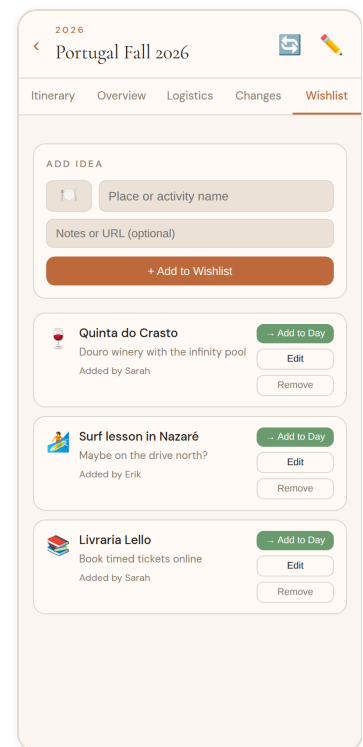

Changes lists the 25 most recent edits to the trip: what changed, who changed it, and when. Use it to answer "who moved dinner to 8?"

9. The Wishlist tab

Wishlist is a shared scratchpad of places and ideas that aren't on the itinerary yet.

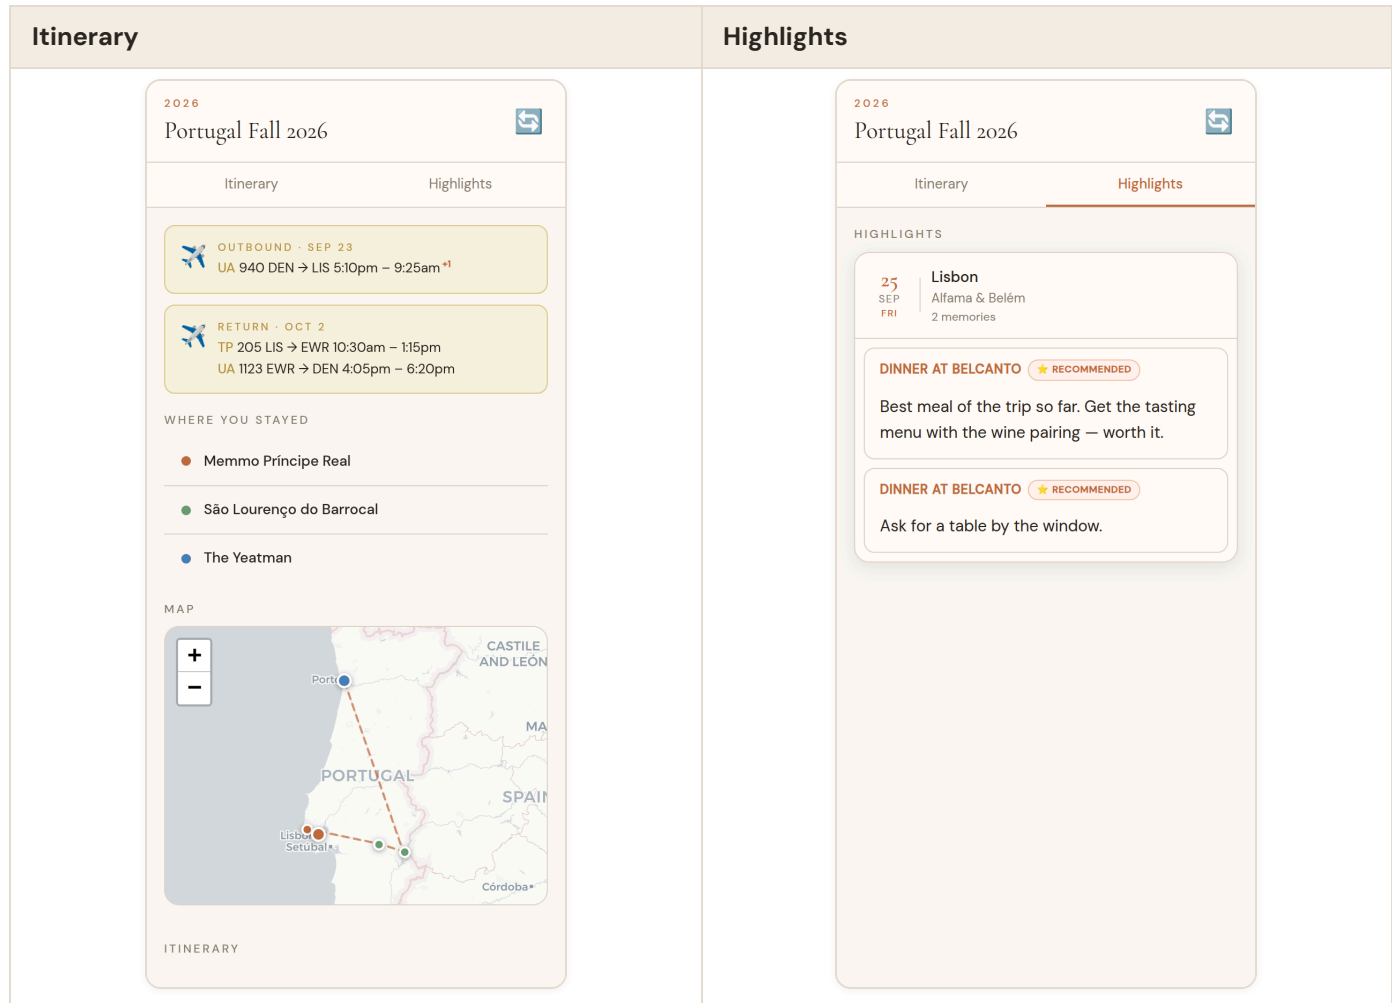

- Enter an emoji, a name, and optional notes or a link, then tap **+ Add to Wishlist**.
- **Edit** and **Remove** do what they say.

10. Sharing a trip

Tap  **Share** at the top of the Itinerary tab. On a phone, the share sheet opens so you can text or email the link. Otherwise the link is copied to your clipboard.

Anyone with the link can view the trip **without signing in**, read-only. The shared view has two tabs:

- **Itinerary:** flights, hotels, a route map and a day-by-day summary.
- **Highlights:** days with memories, and the activities you recommended.

11. The iPhone app

Besides opening the website in Safari, there's a real **Hardin Trips** app for iPhone. It's shared through Apple's **TestFlight** app rather than the App Store.

To install it:

1. Send Erik the email address of your Apple ID. He invites you as a tester.
2. Accept the invitation email from Apple.

3. Install **TestFlight** from the App Store, open it, and tap **Install** next to Hardin Trips.

Signing in works the same as on the website ([section 1](#)). **Sign in with Google** and **Sign in with Apple** open the iPhone's own sign-in sheets.

Updates are automatic. The app always shows the latest version of Trips, so you never need to update it for new features. Every few months TestFlight offers a new build of the app itself. Install it when asked, because older builds stop opening after 90 days.

No signal? The app shows *Can't reach Hardin Trips* with a **Try again** button.

Upcoming Trips widget: the app comes with a home-screen widget that shows countdowns to your next trips and the flights, hotels or cars still to book.

1. Touch and hold an empty spot on the home screen until the apps jiggle.
2. Tap + (or **Edit → Add Widget**) in the top corner.
3. Search for **Hardin Trips**, pick the small or medium size, and tap **Add Widget**.

The widget refreshes about once an hour. Tap it to open the app.

12. Tips and FAQ

Does it work offline? Mostly. The app keeps a copy of your trips on the phone. With no signal, a banner reads  *Offline — viewing saved data*. You can still read everything, and edits you make are sent when you're back online. Photo uploads and maps need a connection.

I don't see my change. Tap  in the trip header to refresh the current tab.

I can't find a trip. You see only the trips Erik has shared with you. Ask him to share the one you're missing.

Can I undo a change? There's no undo button, but the **Changes** tab shows what the value was, so you can put it back by hand.

A place is pinned in the wrong spot on the map. Fix it with the Pin option in the Maps sheet ([section 4](#)).
